

CMA Clearing DPH

Process Journey Map

Actions

Send allocations via FTP
send allocations via email/phone calls

NA

- Chase clients for manual allocations
- Get confirmation from Clients for allocations
- monitor market cutoff

Challenges

time zone difference
bulk allocations
market cut off times
multiple regions, multiple
markets, multiple brokers

NA

- Time zone difference
- no way to know if allocation sent by clients is accurate
- approaching market cut offs
- multiple clients, multiple trades, multiple markets , multiple regions

Opportunity

seamless channel for sending
allocations

NA

reduce manual intervention
spent on email.phone
chasing
ease out load of managing
multiple entities, cut offs

<ul style="list-style-type: none"> • Provide support for development requirement • Investigate issues raised by production teams 	<ul style="list-style-type: none"> • Design and Development for new clients on boarding • Getting client allocations in uniform format <ul style="list-style-type: none"> • Ensuring top day clearing • Clearing of NVision Breaks • Chasing TSU for allocations • Ensuring entry of trades in GMI • Reconciliation (Exchange-Vs- GMI) • Trade break rectification initiation • creating static, accounts, rules 	<p>manually entering allocations received through email/phone</p> <p>Matching of market lines and ticket lines(FTP)</p>
	<p>Supporting various formats in which FTP files are received converting all files into a consumable format by NV</p> <p>Investigating exception breaks in NV</p> <p>delays in clearing due to not receiving client allocation on time</p> <p>managing top day clearing before cut off</p> <p>managing mailbox</p> <p>managing communication with different stakeholders</p> <p>manually entering allocations received via email</p> <p>managing risk and errors related to that</p>	<p>No way to validate allocations sent until T+1</p>
	<p>unified format</p>	<p>manual intervention could be reduced for allocations via email/phone</p>
